	Defibrillator and Bleed Control Kit for Parkgate	**CE5/56**

Further to the Committee's resolution regarding defibrillators and bleed control kits (minute 40, 06.10.26), there has been communication with Elephant Coffee about installation of a bleed control kit in Parkgate along with the replacement of a defibrillator that no longer functions and a defibrillator cabinet that has rusted.

Elephant Coffee have confirmed that they will carry out the weekly check and regular updating of The Circuit if Neston Town Council takes responsibility for purchase, installation and ongoing maintenance costs.

Cost of a defibrillator and cabinet: approximately £1,400+VAT

Cost for defibrillator cabinet installation by an electrician: *(quotation requested but not yet received).*

Cost of a cabinet and bleed control kit: approximately £450.

For Discussion and Decision

To decide whether to purchase a defibrillator/cabinet and a bleed control kit/cabinet and install both on the external wall of Elephant Coffee in Parkgate on the understanding that Neston Town Council will take responsibility for future replacement/maintenance costs and Elephant Coffee will take responsibility for weekly checks and status updates on The Circuit.

Cost to be met from EMR 329 (donations/grants).
