	Document		
		Defibrillator Training	CE5/59c

On 7 July C&E requested that Market & Town Hall Committee confirm whether it would be possible to use the main hall free of charge for community training in the use of defibrillators. It was agreed that C&E would then revisit this issue and consider whether and how regular training sessions might be offered and who would run the sessions.

The Market & Town Hall Committee response is below:

RESOLVED that the Town Hall should be made available for future sessions of defibrillator training without incurring hire charges on the following conditions:

- the sessions must be open to all Neston residents and free of charge for participants;
- the sessions must be facilitated by a suitably trained instructor from a recognised organisation such as British Heart Foundation;
- the Town Council will provide the hall on a hire-only basis, the training provider must hold appropriate insurance to cover the event and the Town Council will not assume any liability for the training sessions;
- the Town Hall will be made available without hire charge for a maximum of six Sunday sessions per year and the timing of these sessions must not inconvenience fee-paying hirers.

For consideration

The Committee will wish to decide if and how it wishes to progress training for the community in the use of defibrillators.

Audrey Duncan
Governance & Operations Manager
