	Resident Correspondence: Traffic Safety at The Cross	CE4/37	

Correspondence received from a resident on 03.09.26:

Please could you look into making the crossroads in Neston safer for both traffic and pedestrians.

The roads in question are Brook Street, High Street and Parkgate Road.

This crossroads road is very dangerous, despite its 20 mile an hour limit, vehicles still travel quickly and it's hard for vehicles to turn out of Brook Street and Parkgate Road to Join High Street safely. The pedestrians are having to run across the busy road (Brook Street) because there's no pedestrian crossing and vehicles are traveling up and down and turning into the road so frequently, they (the pedestrians) have no choice but to run. This is unsafe for all concerned and it's only a matter of time before there's an accident.

I will also be forwarding my concerns to Cheshire West Council, because I believe this problem is only getting worse and needs seriously looking into by ways of making the crossroads safer for all concerned.

Thank you
