	Legionella Assessment & Testing		CE4/43b

C&E resolved to undertake professional legionella risk assessment and sample testing on all three allotment sites (minute 122a, 12.05.26). Officers engaged Legionella Solutions Ltd after obtaining three quotations.

The outcome of the testing was negative but there were some recommendations resulting from the risk assessments. The recommendations for tenants, which relate to management of water butts and hose pipes, have been forwarded to all allotment tenants.

It was recommended that the duty holder (Chief Officer) and the responsible person (C&E Manager) undertake legionella awareness training. Online training for both post holders, as well as the Community Engagement Officer, is currently being arranged.

Audrey Duncan
Community & Environment Manager
